### « Manipulators »

#### **\*\*Whales in a fountain of speed\*\***

Let me introduce the concept  
You'll have to find a new pretext  
Where is the table of contents?  
Whales in a fountain of speed, man

(and now)  
I'm from hell or heaven  
I know noone

Let us focus on the context  
Do we integrate or reject?  
When love becomes a contest  
Might be just as hard to detect

Listen this time

#### **\*\*Critical anxiety\*\***

Why don't you call me another time ?  
with your critical anxiety  
you should become a friend of mine  
with your radical identity  
but that's a different frame of mind  
with such a cynical mobility  
your implications have ramified  
you are incredibly and quietly restrained

when we talk of wild kids  
running in a field of mist  
losing conscience  
whirlwind of evidences

#### **\*\*The dark side of static evolution\*\***

Mind  
if i take the gun  
and shoot your sun  
Life  
Is not that cruel

Harm is so cool  
You take a sense  
In my defense  
Just found a shot  
Where there's a knot  
Around your neck  
Don't be upset  
For your own good  
It's not absurd

Sign  
When you decide  
When you're ready  
To leave envy  
And finally  
Reality  
Not in the mood  
Not understood  
Not in the trip  
You make me sick  
Four yellow strips  
How will they fit?  
That's where we stand...

#### **\*\*Kill and shine\*\***

You let me be yours  
I leave you behind  
You left me unsure  
of what's in my mind

I let u be my treasure  
With high-brow tension inside  
I make you try connections  
You make me kill and shine

“kill and shine, babe...”

Don't be so obscure  
D'you find me uptight?  
And is there a cure  
To repair the stars?

I let u taste my failures  
With high sensations inside

I make u feel attractive  
I make u kill and shine

#### **\*\*Ruby with wings\*\***

We're acting like strangers  
Strangers incomplete  
We're manipulators  
of each other's sins  
a reckless debaser  
a raise in self-esteem  
holy mines of treasures  
spreading atmosphere  
mistaking frustration  
for a begging scream  
it's like an addiction  
I found I just came clean  
Your annihilation  
Makes me real serene

U are a ruby with wings

I make a confession  
Of you I'm really keen  
Neurotic contractions  
Fill my arms with guilt  
I made a great decision  
Today my life is built  
There must be some confusion  
This horizon is bleak  
It's like an execution  
The future on the screen  
A curious intrusion  
In the private sphere  
Your annihilation  
Makes me real serene  
it's like an obsession  
a calculated stream

U are a ruby with wings

#### **\*\*The distress of delight\*\***

I can't save the world tonight  
Rage against the dying of light  
In the distress of delight  
Is a whirlwind of white  
In the syntax of your might  
Oh yeah I guess we decline

I don't wanna stop  
Not again  
Fight  
Not again  
I ain't gonna crash  
Not again  
I ain't gonna crash always

In the weakness of your eyes  
In the field of desire  
Come down  
Sit down  
Come down  
Come...

With a sidelong skittery smile  
And your elbow is my shrine  
Shine your own sacrifice  
At a self indulgent time

Oh I guess we decline  
I don't wanna .....

I can't save your life tonight  
In the distress of delight

Come down , come down, come....

#### **\*\*Fast blast\*\***

I could ask and ask forever  
I could blast your spells this hour  
I could bring a mere disaster  
I could be a new creator

Make my life a hell of torture

Powerful convulsive nature  
Let me be a cruel debaser  
Some place strangely hurt and tender

She knew it could disappear  
His mind arrested in wonder  
Shows us a supreme direction  
Bring me a kingdom of pleasure

I could lie to you  
If it only makes you faster  
I could lie to you  
If you only came close, closer...

**\*\*Serengeti (for Lorelei)\*\***

Never ending monologue  
Did provide area code  
Fallen off a wrong track  
Collection of abstracts  
Isolation did you good  
You were never understood  
Nothing but a sad kid  
Losing it on acid  
Starlight shooter ride  
Give me sugar honey  
Took you to the next train  
Naked birds under the rain  
You take me and i take you  
You don't tell me what to do...

How you've messed up big time  
Now you've messed up big time...

You're a mother icon  
Hanging down the telephone  
Walking naked in the street  
Hassled by a bunch of geeks  
Playing with a microphone  
One more drink and the you're gone  
Crawling like an insect  
My decision's hard to get?  
You're not rid of me yet.

**\*\*The illiterate\*\***

I feel like i'm illiterate  
When i talk to you , girl

I feel that you might liberate  
My spiteful anger

We shrink at a tremendous pace  
You make me wonder

I will however tolerate  
These pointless rumours

Tell me why  
How much time?

I ask : why do you fascinate  
A quiet shadow?

Take care you'd better hesitate  
And take it real slow

You see so many things to hate  
There's blood on the radio

I'd say you're rather obstinate  
You're playing with fire

Tell me why  
How much time?

**\*\*Fix\*\***

Let me tell you one thing  
That you should know  
I've got to tell you something  
Before you go  
I'm not corrupted pristine  
In case you're told  
That everybody's not keen  
Back here no more

You make me wild  
When you fix me for a while  
You make me wild

When you stitch me to the ground  
You make me...

I wanna show you something  
You already saw  
Don't wanna be too obscene  
Talk to my ghost  
I met your sister, she's hiding  
Let me unfold  
The secrets of their yearning  
Back here no more

You make me wild  
When you fix me for a while  
You get me high  
When you stitch me to the ground  
You steal me...

Back here no more!

You make me wild  
When you fix me for a while  
You get me high  
when you're taming my desire  
you blow my mind  
when you fix me for a while  
you make me shy  
when you behave like a child  
you make me....

**\*\*Disconnected\*\***

I can't speak anymore  
I'm disconnected  
I can't move anymore  
I'm reoriented  
When new worlds collide  
This test is stupid  
When new time collide  
A new day's dawning  
We're disconnected.

**\*\*Deliberate me\*\***

Away  
Baby  
You sway  
You are  
Always ready  
Ready to obey...  
Yeah you deliberate me  
Oh yeah  
Yeah you deliberate me...
